Skills Summary

- **Programming Languages:** C++, Python, JavaScript
- **Frameworks & Libraries:** Django, React.js, Redux Toolkit, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, REST API Development
- **Data Analysis:** Numpy, Pandas
- **Database:** MongoDB
- **Machine Learning:** Model development, Algorithm implementation
- **Soft Skills:** Problem-solving, Team collaboration, Communication

Projects

- **LeetCode Clone – AI-Powered Coding Platform:** Built a scalable coding platform enabling users to practice DSA problems with real-time code execution via Judge0 API. Designed an admin dashboard for problem creation, including test cases, starter code, and reference solutions across multiple languages. Integrated an AI-based doubt assistant using Gemini API for contextual problem guidance. Implemented authentication, protected routes, and efficient state management using Redux Toolkit.
Tech: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Judge0 API, Gemini API, Tailwind CSS
- **WhatsApp Chat Analyzer:** A Streamlit-based data analysis tool that processes exported WhatsApp chat files to generate insights such as message frequency, user activity trends, emoji usage, sentiment analysis, and word cloud visualization. Implements data preprocessing and interactive visual dashboards for real-time chat analytics.
Tech: Python, Streamlit, Pandas, NLP, Matplotlib/Seaborn
- **Student Study Portal:** A web-based academic management platform that enables students to access study materials, upload resources, track academic progress, and collaborate on projects. Implements secure authentication and role-based access control with a responsive user interface.
Tech: Django, Python, HTML, CSS, Bootstrap, SQLite
- **Recipe Management Web Application:** A web-based recipe management platform that allows users to create, read, update, and delete their own recipes with detailed ingredients and preparation steps. Implements user authentication (login/logout), personalized content access, and search functionality for efficient recipe discovery. Designed with a responsive interface and secure backend handling for smooth user experience.
Tech: Django, Python, HTML, CSS, Bootstrap, SQLite

Awards and Certifications

- Machine Learning, Internshala Completed a comprehensive course covering essential machine learning concepts and practical applications.
- Secured 2nd position in a college-level Code Debugging competition, demonstrating strong problem-solving skills
- Successfully managed the Project Showcase competition at college, showcasing leadership and team coordination abilities.

Education

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning [Uttarakhand Technical University] – [Tanakpur, Uttarakhand] Expected Graduation: [2026]
